Seniors Plan New Grist Campaign

Get-together at Class Meeting to Extend Subscription Drive

"Bud" Perrin, president of the Senior Class, opened the class meeting held on March 3, 1927, in the large Chem Lecture Room. The main purpose of the meeting was to discuss other methods of selling more issues of the 1927 Grist. No motions were made and no votes were taken but a suggestion was made that each Senior buy at least two copies for himself and as many more as possible for outsiders. This year's book promises to be the best one ever put out in the college. There will be over 200 pages and about 400 pictures in the issue. All this costs a great deal of money and the only methods of paying for the publication of the book is through the advertisements and subscriptions. Slips were passed around to the members and all those who wanted extra copies were asked to sign the slips.

Rifle Team Scores Victory at Storrs

Defeat Conn. Aggies by Fine Shooting; Capt. Harrington High Man for Rhody

In a shoulder to shoulder match last Saturday, March 12, the R. I. State Rifle Team scored a 1763-1744 victory over the Connecticut Aggie marksmen in the annual shooting match. The teams started in firing at 11 o'clock in the morning and the last shot was not fired until 5:20 in the afternoon. The two teams were shooting pretty evenly until Gould of Rhode Island shot a 360 score, beating Watson of Connecticut by 22 points. Capt. Olaf Harrington shot the highest score, that of 361, for Rhode Island, while Logan shot 363 for the Nutmeg Aggies. In the three years of shooting between the colleges, this is the first time that Rhode Island shot to victory.

The individual results is as follows: (The names appear in order of shooting)

Rhode Island					
	Prone	Sit	Kneel.	Stdg.	T'l
Marchand	96	93	87	77	353
Harrington	100	83	95	83	361
Gould	99	96	83	82	360
Leigh	99	93	85	53	330
Armbrust	99	98	92	70	359
Total	1763				
Connecticut					
	Prone	Sit	Kneel.	Stdg.	T'l
Lynch	97	97	86	74	354
Pratt	100	94	91	73	358
Watson	89	94	85	70	338
Gauger	99	98	79	55	331
Logan	98	99	87	79	363
Total	1744				

Varsity Shows Reversal of Form At Brown and at Connecticut

Great Rhode Island Team Bows to Two Opponents; Hurwitz Stars at Storrs; Both Games Marred by Many Fouls

Storrs, Conn., March 12—In a poorly officiated game here tonight, two thousand fans saw the fast Rhode Island State quintet meet its rivals, Connecticut Aggies, upon a well-waxed floor, perfect for a skating match, and not a thrilling basketball encounter. The visitors displayed a flashy brand of ball toward the fag end of the game, but the damage done by the versatile referee and umpire earlier in the contest proved too much for them to overcome. Is it then a surprise that they lost by a count of only four points, 34-30?

Rhode Island was backed by scores of faithful followers who managed to arrive through any possible means. They cheered lustily, ne'er downhearted a bit by the partial work of the officials who were well set to call fouls on "Little Rhody." "Fir" Asher was ejected before the first half was completed, while Haire and Barber just managed to survive the period. Honest, folks, it was tough.

Fighting with their backs against the wall, Rhode Island couldn't score

its initial marker. Possessing the ball for the opening minutes, they missed many shots from all points beneath their basket. Both Haire and Epstein couldn't locate the net. Meanwhile the visitors passed the sphere to cage many a neat basket. With the score 13-0 against them, Rhode Island scored its first point when Alec Hurwitz, popular long distance shooter, stepped up to the center of the court to drop his usual hawkers. The two teams then played evenly for the remainder of the session.

Inspired between halves, the invaders took on a lease of life and penetrated the Aggie defense with practical ease. It was here that Schofield, idol of Storrs students, committed his fourth and last personal. He refused to leave the floor but in a well manufactured and made-to-order fashion he strolled off the court amid cheers and shrieks from Connecticut rooters who had witnessed their star athlete close his basketball career with a penalty. Schildgren, the hero

(Continued on page 4)

"Frosh" Lose Tough Games to Brown And Connecticut

Both Games Fast; Kearns and Wigenhauser Star for Rhody

The Freshman crew of Rhode Island, having set out early in the season upon a wonderful winning chain of six straight, fell short of one contest to even the count with their recently-acquired losing streak. In last week's contests with Brown University and Connecticut Freshmen, they found themselves at the short ends of both games, 26-20 and 42-33 respectively.

The Brown "Frosh" game was by far more interesting. Although they had a comfortable lead for the early half of the game, they soon lost it, never to regain it. At first it seemed a certain Brown victory, for two baskets in quick order found the Rhode Island "Frosh" fighting hard to dent the score. However, Kearns, plucky little forward, proved the master of the situation. He scored three baskets in quick order to put the Green upon a lead. To these scores were added baskets by Ackroyd. When the Providence collegians returned in the second session, they were a new team, inspired and confident. They soon tied the score and hastened to pile up a lead that was stretched to six points when the final whistle blew.

Baseball Will Soon Be in Full Swing

Most of Last Year's Team Will Be Available; Vacancy at First Must Be Filled

"In the spring a young man's fancy lightly turns to thoughts of—baseball." Now that the basketball season has gently passed away, Coach Keaney and his fence-busting lads are eagerly looking forward to a whale of a baseball year. And well can they afford to do so. From the present outlook Rhody ought to duplicate her success on the basketball floor on the diamond.

Let's take a look at the situation. The pitching staff looks nifty. Draghetti, star portsider and heavy hitter, should take the brunt of the ball tossing. Alec Hurwitz, star pitcher of last year's "Frosh" squad, is in A No. 1 condition. Both Alec and Drag will pitch and play first base, according to reports. "Shake" Ernst should come through with his fast ball, while Bill Poutridge will also be heard from. So in spite of the loss of "No-Hit" La Chappelle and Lamont, Coach Keaney is confident of high caliber pitching.

Bill Mackenzie is slated to receive the offerings of the speed boys. Mac played a steady game on the 1929 crew and is in the pink of condition today. Kid Moran will also get a chance to show his stuff.

The infield looks like the gnat's false

Army Once More On the March

Two Afternoons a Week Given to Intensive Training; Companies Show Fine Form

"Comp'ny 'Tenshun!" "Spection Homs!" Capn Hamon's A'mee was again on the march. Every rifle snapped into position, as if delighted at its escape from its long and dusty sojourn in the closet corner. Every uniform was furbished up to present its best "go to meeting" appearance, and every face eager to "get going." Thursday, March 10th, marked the renewal of drill by the Rhode Island State College battalion. Under the able direction of Cadet Major Van Walkenburg and Adjutant Hiller, the men lined up for inspection in four companies, A, B, C and D being commanded respectively by Captains Leigh, Ford, Eckloff and Eddy. In their efforts to retain our present rating as distinguished college and to surpass, if possible, the rating awarded us last year, Captains Hammond and Carter have scheduled two drill periods per week. Under this intensive training the men are rapidly rounding off all rough edges and the eager zest with which drill is run off augurs well for the battalion.

Thursday afternoon drill showed marked improvement over the Tuesday period. If competition for the best company on the field continues keen, (Continued on page 4)

Honor Roll for Semester Posted

New List, Containing 111 Names, Is Largest in History of College; Barney and Matarese on Top

Henry M. Barney of the Beta Phi Fraternity lead the honor list of 111 students for the term ending February 12, 1927. Antonio A. Matarese of Zeta Pi Alpha was second, Lawrence L. McClusky of Beta Phi was third and George Eddy of the Campus Club was fourth.

The first woman student on the list was Laura E. Murray of Sigma Kappa who took fifth place. Miss Murray is a Senior in the Home Economics course.

Sixth place went to Benjamin Fine of the Beta Nu Epsilon Fraternity, seventh to James Devine of Providence, eighth to J. H. Northup of Peace Dale, ninth to David Fine of Beta Nu Epsilon and tenth to Miss Hope Perry of Holyoke, Mass.

Barney, Matarese, B. Fine and Northup are all Juniors taking the Business Administration, General Science, Agriculture and Engineering courses, respectively. McClusky and D. Fine are Sophomores, McClusky taking the Engineering course and

Our Campus

At our last Assembly Dr. Edwards suggested that we take greater care in preserving the fine appearance of our campus. The students at this college should take a personal pride in protecting the beauty that Nature has given us.

All visitors to Kingston remark very complimentary at our beautiful campus. Why not keep it so? Will unsightly paths and overtrodden grass add to its natural beauty? Now is the time when especial care must be taken. One need not be an Aggie student to know that the grass is beginning to grow. This is the season when a simple, thoughtless person may seriously mar the appearance of our entire campus.

In this connection cannot something be done about getting new fields of practice for the R. O. T. C.? Twice a week the entire student army, some two hundred in number, march up and down the campus, trampling and destroying everything beneath it. If, as Dr. Edwards says, it is harming our campus to have one student walk across the grass, how can we begin to calculate the injury done by over two hundred khaki clad students? Oftentimes, when a student is reprimanded for "cutting corners," he retorts, "Why, if the entire army can drill on the campus without rebuke, surely I can."

This lack of co-operation is the wrong spirit to foster among the students. In order to save the good looks of our college grounds and also allow Nature to develop unhampered, why cannot the army find

another drill field? There are several sites that we believe could be made into a satisfactory army field. The plot to the south of Aggie Building, east of Hurricane Alley, could be used to practical advantage. Or the girls' hockey field, near Davis Hall, should prove entirely satisfactory. Thus by using other parade fields the entire appearance of our campus would be improved with very little inconvenience to all concerned.

What do you say, students? Can we have a little co-operation and show our pride in Rhode Island State College? Let's get together and see if we can't protect the natural beauty of our college grounds.

The Bonfire

In last week's Beacon I noticed an article about the bonfire that celebrated our victory over Brown. That article brought to my mind the people who were carrying wood and made me realize that, outside of a few energetic upper classmen, only East Hall Freshmen were "on duty."

As soon as the game was over the other men flocked for home and awaited the weekly paddling session. The East Hall boys, however, were aroused by the upper classmen and gathered to pile up a huge mass of wood. For a whole hour these freshmen labored with the wood until finally the fire was set. After the fire was going, some men were sent out to arouse the lazy members of our school, but their trips were in vain, for many of the men preferred to remain at home.

After the fire had been lighted and the bell set ringing, the students gathered around the fire, attempted a snake dance. This dance got little encouragement, so it was abandoned. There were plenty of Freshmen present. Why didn't the upper classmen make the Freshies join the dance until the fervor of the crowd had been aroused? To cap the event, even after the bell was ringing and the fire was burning, some of the men remained at home. Perhaps they excused themselves on the grounds that they were tired. But if they were tired, how about Asher, Epstein, Haire, Barber, Hurwitz and the other players. These men, although having every reason to be tired, were present at the celebration.

What we need is more action. We must get more co-operation to keep our school spirit alive. We can't have proper celebrations unless our whole student body is present. We need a few more men like Joe Reid to go out and wake up some of our dormant students. Suppose that our next bonfire gets 100% attendance. There is only one way to reach that objective, and that is to make sure that you yourself are there.

H. C. K.

Economics of "Necking"

A liberal education is truly a wonderful thing, and the more liberal it becomes, the more we wonder what it's all about. Its great value to the possessor, however, is undeniable. He is seldom at a loss to explain any problem which confronts him, for he imply applies what knowledge he may have to the new problem, and lo and behold, forth comes a glibly liberal

explanation of that of which he really knows nothing! It's true that only one possessed of an equally liberal education can appreciate the explanation offered—but that's another story.

To illustrate what I mean, let us consider the economics of "necking." At first these two subjects bear no relation at all in your mind, and you object that the whole matter is absurd. True enough—there is no relation between the two—but, let us liberalize a bit.

Economics has certain laws, and a certain amount of "bunk." On the other hand, "necking" we do not think of as having any set laws, but we will all agree I think that there is a wealth of "bunk" connected with it. Now, the X quality in "necking" is the matter of laws governing it. It has a common quality with Economics—that of possessing a degree of "bunk"—and Economics has definite laws: Therefore, why do not the laws of Economics apply equally well to "necking?" My answer is that they do.

In Economics we deal with goods, and a good is anything which possesses utility—that is, gratifies a human desire. Now, "necking" gratifies a human desire as well as anything I know of, and may, therefore, be readily accepted as analagous to economic goods. A kiss, then, the economic good of "necking," and should follow the same laws governing economic goods. Economic goods have a place of exchange, known as a market—a rather nebulous concept at best and quite elusive to try to put one's finger on with certainty. "Necking" also has a place of exchange, for its "good"—the kiss—and this market may be found on rustic benches, in automobiles, hallways, and so on, and is every bit as elusive as the economic market in that respect. So far we are progressing well. We have seen now that the fundamental materials of Economics and of "necking" are very similar.

Let us, then, apply some of the laws of Economics to "necking," and see if they, too, go well together.

Take the laws governing supply and demand, as relating to value in Economics. We know that the value of any commodity is determined by two factors: The scarcity or abundance of it; and, the desire for it. The scarcer a good is, the greater is its value. Consider, then, the application of this principle to the kiss. If a young lady manufactures only a few of them, and the demand for them is great, their value is high. But now suppose she increases her output. The demand remains the same (for "necking" is a fairly constant human desire), but there are more kisses on the market, and just as in the economic world, abundance decreases value, and her kisses are valued less highly. This raises the question as to whether or not we may find something comparable to the business cycle of Economics, in "necking." The business cycle consists of three phases: Prosperity, crisis and depression. Let us suppose now that the young lady is in the prosperous "necking" stage: The demand for her kisses is great, and she is just meeting the demand, and all goes well. But sooner or later, her popularity offsets this balance. She begins to turn out more and more kisses. The market is flooded; the kisses have become too many for the demand; their value begins to go down, and the demand for them correspondingly decreases. She is now in the crisis phase of the

"necking" market. The period of depression begins; the demand grows less and less. This forces her to curtail the output. This curtailment results in her kisses becoming more and more scarce. This scarcity, in view of the constant demand, now stimulates a new and increasing demand. The value of her kisses becomes greater and greater, and the period of depression is over, and prosperity again follows. And thus the cycle is repeated over and over again, as in the economic world.

The elements of speculation are also to be found in the field of "necking" as well as in that of Economics. In the business world the speculator makes an investment in anticipation of future profit from it. The male of the species, every time he devotes his time and money to a new feminine prospect, is, speculating. If she "necks," his investment brings the desired profit. If he has anticipated wrongly, and she does not live up to his expectations, he loses on his investment.

Likewise, the elements of monopoly are present in both Economics and "necking." The young lady who has a particularly desirable brand of kisses, is able to control the market, and reap a greater gain, through the high value of her product, than her less fortunate sister.

It would be possible to go on through many other laws of Economics and show how they are equally applicable to the business of "necking," but these few instances, I think will suffice to illustrate the point which I desired to bring out—that "necking is subject to the same laws as Economics." I must confess that some aspects of the Economic world—the existence of middlemen, and so on—finds no analogy in the business of "necking," as yet, though with the progress of our as yet elementary "necking" industry, we may look for some further development in this respect.

All in all, we have an instance of the application of a liberal education al line of reasoning, applied to Economics and "necking," and I trust that those of my readers who happen to be ardent lovers, will be liberal enough to forgive my reducing the soul-stirring kiss to the plane on which it follows the same laws as govern the manufacture and sale of a mouse-trap.

Tufts College Dental School

offers a three-year course leading to the degree of Doctor of Dental Medicine. Candidates for admission must present a certificate from an approved high school, and in addition must have completed two years of work in an approved college of liberal arts and science, including six semester hours in each of the following subjects: English, Chemistry, Biology and Physics. Men and women are admitted. The session for 1927-1928 will commence on September 28, 1927. For further information write to

Faculty and East Hall Still Tied For First Place

Profs. Have Tough Battle with Campus Club; Theta Chi Takes Deses in Fast Battle

Except for a few "close shaves" the Frat League standing remains the same. The two toppers came within an inch of being tossed from their respective lofty positions, but both Faculty and East Hall managed to pull their games out of the fire.

East Hall took on the lowly situated Beta Phi crew, and the latter squad rolled up a score of 12 points before the Red Shirts got going. The invincible Peratta came thru with sufficient tallies to win the game, 25-13.

Faculty got the surprise of its short existence when Campus Club gave the old timers a run for their money. Before the exponents of Ponce De Leon knew it, Campus Club was leading them by several points. At this point one of our leading athletes, Frank Keaney, decided that the prize cup was too valuable to lose. Casting discretion to the winds, coach jumped into the fray and at the final toot of the whistle the score was 21 to 18, with the Faculty again tied for top place. East Hall and Faculty now have one game to play. If both win, or if both lose, a play off will be necessary.

In the other games, of the week, Theta Chi closed up on Delta Sigma by defeating them 15-14 in an exciting battle. This makes the Deses third trouncing in a row. P. I. K. gained a lap by downing Zeta Pi 21-9, while Phi Sigma put the skids on Delta Alpha 11-5.

The final week is now in session, most teams having but one game to play.

BASEBALL IN SWING

(Continued from page 1)

teeth. With Hurwitz, Draghetti and Red Haire to cover the initial sack there's bound to be plenty of base hits nipped in the bud. Second base looks like a million gold coins in the U. S. Bank. Firpo Asher, the "dancing phool," Bill Trumbull and Sam "Eppy" Epstein of the Epstein Coup, ought to stop everything in sight this year. Stevens, Star slugger and speed boy of last year's varsity, will probably cover short again. Eddie Erickson, the one senior of the infield, will cavort around third base as usual.

The outfield is full of optimistic possibilities. Walt Siuta will probably occupy a permanent place in right field. Siuta's batting average last year shows him to be a dangerous hitter as well. Sticky Blake, pride of White Rock quarry, is slated to go big in the field. Ziochanski will occupy an outfield berth, while Pykorz and Szulich of the "Frosh" squad ought to roll up the old score.

Marchand may prove to be a dark horse this year in the field. Maclearn is out for a kill around third base, while Pat Rinaldo is eager to get whooping in the garden.

The above list includes some dangerous hitters, as Hurwitz, Pykosz, Asher, Stevens, Draghetti, Szulich; Siuta and Blake are all in the .300 class. The boys are keeping in mind the 1926 score, R. I. 3, Brown 2, and are out to duplicate the feat in the first game of the year.

HONOR ROLL

(Continued from page 1)

Fine the Business Administration course. Eddy and Devine are Seniors, Eddy taking the Electrical Engineering and Devine the Civil Engineering course. Miss Perry is a Senior taking the Home Economics course.

The first freshman on the list is H. A. Droitcour of Delta Sigma Epsilon. Droitcour is taking the General Science course.

Of the 111 who made the honor list, the seniors were in the lead with 31%, the Freshmen second with 24.5%, the Juniors third with 23.3% and the Sophomores fourth with 22.6%.

The women students again showed their high scholastic abilities, making far higher records than the men. The women placed 40% of their members on the honor list while the men could place only 20.8%.

Of the different courses in the school, the agriculture course placed the highest proportion of its members on the list, there being 44.5% of its members on the list. The Home Economics course was second with 39% and the Chemical Engineering third with 30.5%. Following in order came the General Science

Do not plant the same crops this year in the same place in the garden they occupied last year. Different crops require different kinds of soil food and even a little "crop rotation" is better than none at all.

"FROSH" LOSE

(Continued from page 1)

Appearing at Connecticut upon a floor slippery as a skating rink, they could not present a very good exhibition against the Storrs "Frosh." The result was that the big lead of the homesters saved them in their 42-33 triumph.

Ryan, hanging baskets in the first half, scored the most points for the victors. He counted eight in all in the first session. Lamoureux was equally as good. In the second period the Rhode Island team was a different team. They forgot their worries and outplayed the Connecticut combination completely. In this half they scored nineteen to the twelve points of the winners. Wiggenshauser, rangy forward, and Mat Kearns supplied the interest of the evening with their stellar long distance shooting that drew repeated applause from the thousands present. Ackroyd again played a superb game at center.

Having slid all evening, Turla, Bober and Kearns have learned to skate and are now going to go to church each Sunday on roller skates.

"Companion cropping" consists in growing two crops together. It works well.

W. S. G. Open Forum Interests Students

Modifications of Rules Suggest- ed, and College Interests Dis- cussed

Something new, something differ-ent, something interesting, and something worthwhile! An "open" Women's Student Council meeting, at which two delegates chosen from each of the two upper classes and one delegate each from the lower classes were asked to sit in and dis-cuss any matter of interest W. S. G. controls. The affair was a big suc-cess, for matters of varying kinds were talked over and about thor-oughly, due partly to the small num-ber of people, the unusual interest and the idea of "talk now, or forever hold your peace." At next Dean's Hour these items will be presented to the association for further dis-cussion and action. The idea of such a forum seems to be rather popular, and actually does benefit the wom-
en, since the delegates represent the opinions of their respective classes. We hope it will be continued in the future at least two or three times a year. The delegates were: '27, Har-riet Lewis and Mildred Thompson; '28, Evelyn Hopkins and Alice Sims; '29, Elizabeth Curtis; '30, Ruth Bishop.

ARMY ON THE MOVE

(Continued from page 1)
the annual inspection should prove exceedingly interesting. Captain Hammond would ask nothing better than to secure the highest rating in the First Corps Area. This distinction is now enjoyed by Norwich Univer-sity, a strict military school which enforces daily drill.

Our unit gave the leaders a close rub for the honor last year, and with this material as a nucleus the com-mandant hopes to build a unit which will fulfill his ambition. With hearty co-operation which the men appear to be giving this year there is every likelihood that we can secure this rating. We have the officers, the teachers, and the ability. The best unit in the First Corps Area is our objective. We can attain this objec-tive! "Let's Go!"

VARSIITY SHOWS REVERSAL OF FORM

(Continued from page 1)

of the evening, was likewise sent to the showers a few moments later. Rhody commenced a scoring spree that carried them to within one point of the Aggies. An easy shot missed be-neath her basket lost the affair for Rhode Island, for soon after Connec-ticut staged a thrilling drive that net her the game.

Hurwitz was the only member of the visiting crew who played up to his standard. He, besides command-ing the proceedings for Rhode Island from the rear, often shot his usual long shots that have so often proved the deciding factor in the White and Blue's previous wins. Trumbull, a substitute, played wonderful ball for his short stay in the pastime. Cap-tain Red Haire was guarded for ev-ery move of his.

Ellovich, substitute center, played excellent ball for Connecticut, while Watson supplied the deciding points with his six foul shots. Though de-feated, Rhode Island played wonder-ful ball.

Two-thirds of the crowd of 800 filled Lyman Gym at Providence last Wednesday and saw Rhode Island State lose an unexpected and heart-breaking match to Brown University by the score of 38-26. It was the biggest upset in major New England collegiate games. Brown had previ-ously been beaten by a score of 41-20 here in Kingston.

When the team "cracked" in the second half, the University boys took advantage and scored many baskets from all points of the floor to bring home a much sought basketball vic-tory. Rhode Island could not solve the attack of the homesters.

In a pleasing fashion, Captain Haire and his crew lead for the first half. They had already piled up a lead of 8-0 when Captain Heffernan, star of the evening, dropped a beautiful one-hand shot from the side of the court. He scored two more in similar fashion before the session ended. Rhode Is-land was far ahead when the half ended, 19-11.

It was after this that the breaking of the visitors' teamwork surprised everyone.

The mite Epstein proved the leading scorer for Rhode Island with four field goals and a foul. Asher, in his abbreviated stay, came a close sec-ond. Heffernan was Brown's point-getter, while its best floor man was McGeeney.

Economist Ball Will Fool You!

Apri. Fool's Dance to Be "Best Yet"; Committees Arrange Many Novelties

Preparations are being made to make the Economists' Masquerade Ball the most successful affair of the season. The dance will be given Fri-day evening, April 1, from 9:00 to 1:00 a. m. To add to the color of the af-fair, it is desirable that everyone come in a costume, from that of a Chinese mandarin to that of a member of the R. O. T. C.

The Hotel Mayflower orchestra, from Hyannis, on the Cape, has been secured for the occasion. Their serv-ices have been secured through the aid of Howard Canfield, who played with them during the past season.

Mr. Maurice H. Conn, president of the Economists' Club, has been elected chairman of the dance, and has been entrusted with the power of appoint-ing his own committees.

Miss Margaret F. O'Connor is chair-man of the Decorations; Mr. Romeo De Bucci, chairman of Music; Law-rence F. Dring, chairman of Floor; C. K. Brown, chairman of Patrons and Patronesses; Connie Friedman, chair-man of Programs; Joseph Clegg, chairman of Refreshments.

Miss Elza Gramelsback, Alan Hiller, Clinton F. Armstrong, Howard M. Mil-ler and H. Moulton Barney are mem-bers of the various committees.

Clowns, Chinks, beggars, Arabs, In-dians, Spaniards, soldiers, cowboys, sailors, business men, college students, bathing beauties, ambassadors and baseball uniforms will be in full dis-play at the Ecos' Masquerade Ball.

Prizes will be given for the most original, typical or representative and comical costumes. Show your origin-ality in your costume and "cop" a prize.

Johnny Walker has given advance information that he intends to wear the kilties of the Black Watch. Joe Reid will masquerade as Silk Hat Harry, the roulette shark of the by-gone Mississippi Showboat days.

Mandarin Hong Kong Conn will ap-pear in the regalia of a Chinese War Lord sent over from China by his uncle, One Long Pha-wa-wa.

What will you come as? Think up a good costume. But costume or no costume, be sure and come!

IT'S A FACT,
AFTER ALL,
QUALITY
COUNTS!
